An exclusive bus shuttle is also provided, to make travelling to and from the event as easy as possible.

We look forward to seeing you!

Creating a successful future together!

The international passenger and freight transport industry will be meeting for the 10th time, from 23 to 26 September 2014, at InnoTrans in Berlin. This year the gathering of experts provides again an ideal platform for the next generation, in order to plan and develop their careers and to make direct contact with the industry.

In the **Career & Education Hall 7.1c** the subjects of careers, training and science are being combined under a single roof. For pupils, trainees and students with a particular interest, this hall provides a wide-ranging platform to help them gain access to the industry and follow a career in the railway sector. The HR departments of numerous well-known InnoTrans exhibitors, German and foreign universities, specialized publishing companies and associations, as well as recruitment agencies are presenting their range of services in the Career & Education Hall.

At the **Career Pavilion**, the focal point of the Career & Education Hall, representatives of the human resources departments of several companies and associations are available for in-depth discussions, valuable advice and a range of details for anyone planning a career in the rail industry.

Companies will be using the **Career Forum** to introduce themselves, provide details about specific career opportunities and participate in panel discussions. They will also give answer to the questions from newcomers to the industry in a number of informal discussions.

Participants

(As of May 2014, subject to alterations)

Well-known companies and associations from the rail industry are again represented at the Career & Education Hall this year:

Allianz pro Schiene	
DB Mobility Logistics	CIDEON Engineering
Fachhochschule St. Pölten	ESTACA European Railway Agency
GA Netztechnik	HECTOR School of Engineering & Management
Liebherr-Transportation Systems	logvocatus Gesellschaft für eCommerce und Logistik
Powerlines Group	Siemens SMA Railway Technology
Stadler Pankow	Thales Deutschland
Trapeze Switzerland	University of Birmingham
Verband der Bahnindustrie in Deutschland	Zukunftsbranche Bahn

The global job market at a glance – this is also offered at InnoTrans. For anyone planning a career the **Job Wall** in the Career & Education Hall provides a quick overview of the very latest and international vacancies in the rail industry.

Prior to and after InnoTrans the **Online Job Market**, part of the Virtual Market Place®, at www.virtualmarket.innotrans.com, keeps qualified newcomers to the industry informed about the very latest job vacancies. With each passing day in the run-up of the event in September, the range of vacancies on offer is constantly increasing.

The **Career Point**  can be instantly recognized and identified by its round logo. It is used to help identifying those companies and associations at InnoTrans with qualified staff on their stands to advise about career openings and opportunities. The Virtual Market Place® and the InnoTrans App enable newcomers to the industry to plan their visit in advance, to select exhibitors of particular interest and to work out a route around the halls.

Tickets

Reduced rate tickets for InnoTrans are available for students, trainees and school pupils for only 12 EUR. Holders of admission tickets are also entitled to use local public transport in the greater Berlin area on the day of their visit. To obtain reduced rate day tickets please send an email to: kartenservice@messe-berlin.de

Career Tour

This year guided tours for students will be offered for the first time. These tours will be focusing on specific topics and on those exhibitors who are participating with the Career Point in the halls, and also including the Career & Education Hall. For registration: www.innotrans.com/Visitor-Info/Career Concept/

The benefits at a glance

- Direct contact with potential employers
- Human resources managers of well-known companies will be on hand
