

Security challenges

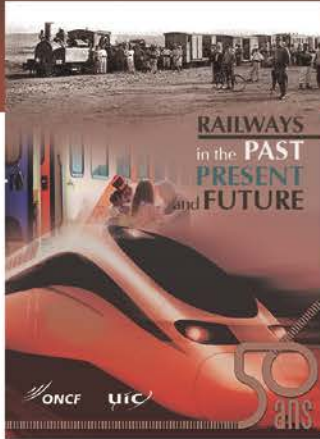

Jacques Colliard
Manager UIC Security Division

Marrakech
March 6th 2014

Societal issues and security challenges

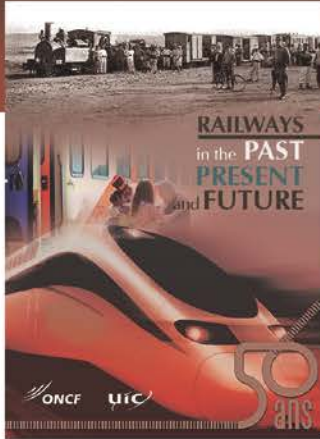

An unavoidable reality: the issues ...

- Daily journeys: Freedom to come and go
- Railway system: Territorial planning, high speed, investment costs

...need to be protected

Societal issues and security challenges

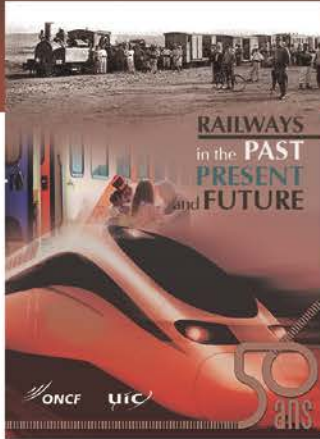

What kind of protection?

- the safety of railway systems, history of our companies
- external factors: climate, geological accidents
- security serving all areas of activity, supporting public authorities

Societal issues and security challenges

Security:

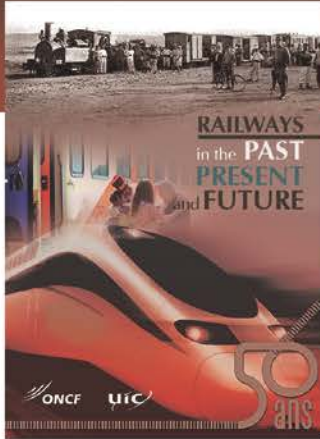

Protecting the rail system against malicious intentions...

...from day-to-day crime to terrorism

- Supporting public authorities, serving all areas of activity to develop the business
- By coordinating human factors, technologies and regulations
- By developing a particular strategy for stations, whose role is constantly evolving

Societal issues and security challenges

The customer's point of view:

- **Coherence of strategies and resilience of systems: implementing a global policy**

- **Partnerships and crisis management**
ONCF exercise of 28 February 2012
