ACRONYMS AND TERMINOLOGY

UIC Union Internationale des
 Chemins de fer

1. PREAMBLE AND BACKGROUND

UIC, the International Railway Association founded in 1922, counts some 200 members across 5 continents, including railway companies, infrastructure managers, rail-related transport operators & research institutes. The UIC mission is to promote rail transport at world level and meet the challenges of mobility and sustainable development.

The mission of the UIC Railway System Department is creating sustainable technical solutions for the railway business, aimed at increasing its competitiveness as compared to other modes of transport, while considering not only single domains, but the railway system as a whole.

TrainDy is a UIC-approved software program that calculates longitudinal forces along trains. A key feature of the TrainDy software is its capacity to solve both pneumatic problems (venting of brake pipe and filling of brake cylinders) and mechanical problems (computation of relative movement between consecutive wagons). This feature makes TrainDy a valuable tool for risk analysis on new heavier and longer freight trainset compositions applying the IRS 40421 methodology avoiding partial or total in-line tests.

TrainDy can be used to:

- Analyse train failures (derailment, disruptions, etc.).
- Understand the influence of technical parameters or operating conditions.
- Optimise train productivity (increasing train mass or length, defining new driving rules for trains or design rules for rolling stock).

The TrainDy software is managed and developed in Matlab (an international standard programming language) by the UIC TrainDy Special Group.

The software is available to members of the TrainDy Special Group.

The objectives of the special group are to keep the TrainDy software up to date and to increase its membership in order to maximise the use of TrainDy among freight operators and deliver services to customers interested in productivity gains.

Today the group contains 6 active members:

Railway undertakings: DB AG, SNCF, TRENITALIA

Industrial companies: Faiveley Transport (a Wabtec Company), Knorr Bremse

University: University of Rome Tor Vergata

UIC has the source code for the current Java-based user interface, as well as the software user guide. This interface is linked to TrainDy executables whose computational source code is developed in Matlab.

The service provider will have 7 months to develop a web user interface with access conditions on line based on the previous input data provided by the UIC.

The use of the developed product will be as simple as possible (at least equivalent to the current interface).

The service provider will have contacts within Special Group TrainDy. A steering committee meeting will be held every month to assess the progress of the project.

The service provider will have to propose a V0 version after 4 months.

Beta versions will be checked by the steering committee of the TrainDy Special Group.

The final version will be delivered a maximum of 8 months after the start of the project, provided that all the above conditions are met.

The service provider must submit the source code for the "TrainDy on Web" version at the end of the study. A product user guide will be integrated into "TrainDy on Web" on the platform.

Deliverables must comply with UIC IT integration specifications, which are attached in appendix to the present document.

In addition, the service provider shall provide:

- Maintenance contract with different service levels, price differentiation, and one-year included maintenance.

- GDPR compliant, servers to be in Europe.

Running Phase

- List of suggestions of enhancement from the software users to ensure the proper implementation of the present specifications, to be handled within 3 months from reception.
- Maintenance contract to include a service 5 days per week, one day reaction time at reception of request.
- 40 simulation cases and one standard test case for calculation speed or graph editing for post-processing.
- The opening time of 'Traindy web' is 5 seconds.
- The calculation response time is 30 seconds (all inclusive) for an initial speed of 30 km/h and a train of 30 wagons.
- The time to generate a graph based on the calculation result is 5 seconds.

In case the application developed deviates from the previous criteria, the tenderer shall provide the performances that the application "TrainDy on web" will satisfy.

Nevertheless, tenderers must designate (through a power of attorney signed by each member) one of the economic operators as a single point of contact (the leader) for administrative and financial aspects as well as operational management of the contract.

After the award, UIC will sign the contract with the leader on behalf of all members of the group, authorised by the other members via powers of attorney.

11. AWARD CRITERIA

The contract will be awarded based on the most economically advantageous tender, according to the 'best price-quality ratio' award method. The quality of the tender will be evaluated based on the following criteria. The maximum total quality score is 100 points.

- 1. Understanding of and previous experience with the topic**
(30 points – minimum threshold 15 points)

- 2. Quality of the proposed methodology**
(40 points – minimum threshold 20 points)

- 3. Organisation of the work and resources**
(20 points – minimum threshold 10 points)

Tenders must score minimum 50% for each criterion and sub-criterion, and minimum 70% in total. Tenders that do not reach the minimum quality levels will be rejected and will not be ranked.

Applicants shall specify to what extent they can meet each individual criterion in the tender, providing example of previous work whenever possible.

No right of appeal shall exist on the selection procedure or its outcome.

The contract will be awarded to the most economically advantageous tender, i.e. the tender offering the best price-quality ratio determined in accordance with the formula below. A weight of 70/30 is given to quality and price.

$\text{Score of tender T} = (\text{cheapest price}) / (\text{price of tender T}) * 100 * 30\% + (\text{total quality score out of 100 for all award criteria of tender T}) * 70\%$
