"Pourquoi les gestionnaires d'infrastructure ferroviaire doivent-ils recourir à l'AM ?"

Why railway infrastructure managers need Asset Management

Vincent MAUMY
SNCF & RFF
Network Maintenance Director

UIC Asset management
Global seminar
October 03, 2013
Asset Management: Context (1) and three Major Ideas (2 - 4)

1 - An impossible equation in a context of a very contractual relationship that existed before between SNCF-Infrastructure and RFF

2 - Asset Management enables us to determine what the basic problems are for the future of the network

3 - Internal benefit of Asset Management: to improve a long term vision of needs of maintenance track by track

4 - External benefit of Asset Management: to be able to explain our strategy to the Regulation Authority or other government authorities
