Save the date: UIC Global Rail Freight Conference to be held from 27 – 29 June 2018 in Genoa, Italy

GRFC is one of the leading and most prestigious events dedicated to rail freight and logistics at world level. The main theme of this year’s edition is “Modal Integration at the service of Global Distribution”.

Why Genoa? Because Genoa has historically been one of the most important ports on the Mediterranean Sea: it is currently the busiest in Italy and twelfth-busiest in the European Union. It is also one of the extremities of Rail Freight Corridor (RFC) 1 - Corridor Rhine-Alpine (Rotterdam – Genoa). Traditionally, Genoa also has an important role in the global maritime transport flows.

A host of prominent speakers representing the political and economic sectors, international institutions, and all actors of the logistics chain, among them railways, ports and shipping lines, multi-modal operators, business and trade, will hold round table discussions and sessions on key themes such as mega trends, mental shift to foster modal shift, transcontinental corridors – including Euro-Asian corridors and the New Silk Roads – or innovation to boost productivity.

A series of events will also provide a unique opportunity for networking and promotional activities as a professional exhibition will run in parallel.

More information will soon be available on the dedicated website www.uicgrfc.org
