

UIC SUSTAINABILITY IMPACT AWARDS 2024

APPLICATION

in partnership with the
Sustainable Development Foundation

**Application
deadline:**

15 May 2024

Award ceremony:

25 September 2024,
Innotrans Berlin

INTERNATIONAL UNION
OF RAILWAYS

The UIC Sustainability Impact Awards 2024

A prestigious competition organised by the International Union of Railways (UIC) in collaboration with the Sustainable Development Foundation. The aim of the awards is to honour and showcase outstanding achievements in the global railway sector, with a strong emphasis on sustainability.

The UIC Sustainability Impact Awards is continuing its mission to recognise and shine a spotlight on the best practices, innovative technologies, and effective management strategies from railway companies that contribute to making transport even more environmentally friendly, more efficient, and ethically responsible.

The International Union of Railways is the worldwide organisation for the promotion of rail transport at a global level and for the collaborative development of the railway system. It brings together **more than 200 members across all five continents**, including railway undertakings, infrastructure managers, and railway service providers.

UIC also maintains close cooperative links with all stakeholders in the rail transport domain around the world, including manufacturers, railway associations, and public authorities, as well as in other domains and sectors whose experience may be beneficial to rail development.

UIC's main tasks include understanding the business needs of the rail community, developing innovative programmes to identify solutions to those needs, and preparing and publishing documents, such as reports, specifications, guidelines, and IRSs that facilitate the implementation of these new solutions.

#UICrail

An award ceremony

organised during Innotrans, the International Trade Fair for Transport Technology

An opportunity to meet

as a community and highlight and share the transformative action being taken in rail

4 different categories of innovation and sustainability:

from stations to rolling stock, and from social outreach to cities and the environment

The importance of sustainability

The current climate emergency and the imperative need for global action underscore the critical need for railways to adopt sustainable practices

Taking action to transform the way we live, work and move has never been so urgent

Transport is at the core of environmental and social transition. Railways must play an even bigger role in creating a sustainable transport system

Why nominate your organisation?

For:

- The chance to win or be shortlisted for a high-level international award
- The possibility to show how your organisation is making positive sustainable change
- A way to promote your organisation's cutting-edge innovation to international stakeholders

Who is eligible to apply for the award?

Nominations are open exclusively to UIC members

When do nominations close?

All projects/initiatives must be submitted by
15 May 2024

Award Categories

The UIC Sustainability Impact Awards 2024 categories recognise the range of innovation which is transforming the rail sector today. The categories are divided into 4 macro-subjects, each devoted to a different aspect of sustainability. Each category aligns with the UIC 2030 vision “Design a better Future” and connects to a number of the United Nations Sustainable Development Goals.

These categories celebrate the best of the best, and will be given to the projects, initiatives and individuals who have made the most notable contribution to sustainable development.

The projects submitted should be able to demonstrate that they had an impact in 2022-2023.

Customer Service

Accessibility, diversity and inclusion

Recognise projects and programmes that go beyond regulatory requirements to create an inclusive and accessible railway environment. This includes measures to improve physical accessibility and social inclusivity, provide assistance for passengers with additional needs, and implement policies that embrace diversity and inclusion for both passengers and staff.

Climate change adaptation and resilience

Recognise projects that actively contribute to climate change adaptation and resilience, ensuring that railway services can withstand and recover from the impact of extreme weather events and other climate-related challenges.

Innovation

Energy and decarbonisation

Recognise projects and technologies that demonstrate a commitment to sustainability by lowering energy consumption, increasing the use of renewable energy sources, and actively participating in efforts to combat climate change within the railway industry.

Natural resources

Highlight projects and technologies that demonstrate a commitment to sustainable practices by minimising the depletion of natural resources, optimising the use of resources, and adopting environmentally friendly approaches, with a particular focus on promoting biodiversity and circular initiatives in railway development and operations.

Cities and Communities

Modal shift

Recognise initiatives, strategies, and projects within cities and communities that successfully promote the transition of passengers or freight from traditional, less sustainable modes of transport to rail services.

Healthy cities and communities

Acknowledge efforts that enhance the quality of life in cities and communities by prioritising health. This can include measures to reduce air pollution, noise, and the overall environmental impact of transport.

Seamless Connectivity

Acknowledge and celebrate partnerships that improve overall connectivity by enabling a seamless transition and efficient interchange between various modes of transport. This encompasses initiatives aimed at enhancing accessibility, minimising transfer times, and offering passengers convenient and integrated travel options.

As part of this, improving accessibility involves integrating information, digitisation, and ticket sales, as well as physical connectivity, which all contribute to a more harmonious and connected travel experience.

Judging Process

1. Your nomination will be reviewed for **completeness, eligibility and adherence** to the application guidelines.
2. The judges for each category will score your application according to the following parameters:
 - **35%** Impact on SDGs (with a high score if several SDGs are being contributed to)
 - **35%** Demonstrable and quantifiable impact for the category
 - **15%** Demonstrating staff and/or community engagement (collaboration and communication)
 - **15%** Longevity, scalability, replicability -> fostering long-term change

This score determines the shortlist for each category.

3. If your application is shortlisted, the judges will meet to discuss and decide on a winner
4. For each category, a final ranking will be compiled with the shortlisted applications being invited to the awards ceremony
5. The winners will be announced during the award ceremony, organised as part of InnoTrans, the International Trade Fair for Transport Technology.

How to apply

Step 1

Read the [application guidelines](#) carefully

Step 2

Create an account on the award dedicated website: [UIC Sustainability Awards](#)

Step 3

Fill in the online application form and choose your category: [UIC Sustainability Awards | Submit your Application](#)

Step 4

Wait for our feedback. If you are shortlisted, you will be invited to present your project to the Jury in and online meeting

Step 5

If you are a final shortlisted, you will be invited to the awards ceremony planned during InnoTrans in Berlin

Awards Ceremony 2024 Edition

The final awards ceremony will take place on **25 September 2024** during the InnoTrans trade fair, at the Alstom stand. In addition to being a celebratory event, it will also offer an opportunity to reflect on the central themes of transport sustainability and to network with companies and institutions from the sector.

PROGRAMME

18.30	Welcome drinks
19.00	Awards ceremony
20.15	Reception

2022 Edition

Key figures

InnoTrans 2024
24 – 27 SEPTEMBER · BERLIN
International Trade Fair for Transport Technology

Innotrans is the world's leading trade fair for transport technology and provides a comprehensive overview of the innovations in the mobility sector. With the segments "Railway Technology", "Railway Infrastructure", "Public Transport", "Interiors", and "Tunnel Construction", the event is an ideal business platform for both buyers and decision makers who represent transport companies, vehicle manufacturers and their suppliers.

THE UIC SUSTAINABILITY IMPACT AWARD

Guidelines

The International Union of Railways (UIC), in collaboration with the Sustainable Development Foundation, is organising the UIC Sustainability Impact Awards 2024. The aim of this competition is to honour and showcase outstanding achievements in the global railway sector, with a strong emphasis on sustainability.

Building upon the success of the previous edition held in 2022, the UIC Sustainability Impact Award is continuing its mission to recognise and shine a spotlight on best practices, innovative technologies and effective management strategies that contribute to making rail more attractive, efficient and ethically responsible, and to reducing its environmental impact.

The UIC award 2024 is divided into four categories, each devoted to different aspects of the UIC '[Design a Better future](#)' vision 2030.

The categories are aligned with key UN Sustainable Development Goals and consideration is given to the contribution to the targets of each.

1. Cities and communities

Modal shift

 Recognise initiatives, strategies and projects within cities and communities that successfully promote the transition of travellers or freight from traditional, less sustainable modes of transport to rail services.

Healthy Cities and Communities

 Acknowledge efforts that enhance the quality of life in cities and communities by prioritising health considerations. This can include measures to reduce air pollution, noise and overall environmental impact associated with transportation.

2. Innovation

Energy and decarbonisation

   Recognise projects and technologies that demonstrate a commitment to sustainability by lowering energy consumption, increasing the use of renewable energy sources and actively participating in efforts to combat climate change within the railway industry.

Natural resources

  Highlight projects and technologies that demonstrate a commitment to sustainable practices by minimising the depletion of natural resources, optimising resource utilisation and adopting environmentally friendly approaches, with a particular focus on promoting biodiversity and circular initiatives, in railway development and operations.

3. Seamless Connectivity

Acknowledge and celebrate partnerships that improve overall connectivity by enabling seamless transitions and efficient interchanges across various transportation modes. This encompasses initiatives aimed at enhancing accessibility, minimising transfer times and offering passengers convenient and integrated travel options. Accessibility, in this context, involves the integration of information, digitisation, ticket sales, as well as physical connectivity, all contributing to a more harmonious and connected travel experience.

4. Customer Service

Accessibility, diversity and inclusion

Recognise projects and programmes that go beyond regulatory requirements to create an inclusive and accessible railway environment. This includes measures to improve physical accessibility or social inclusivity, provide assistance for passengers with disabilities and implement policies that embrace diversity and inclusion among both passengers and staff.

Climate change adaptation and resilience

Recognise projects that actively contribute to climate change adaptation and resilience, ensuring that railway services can withstand and recover from the impacts of extreme weather events and other climate-related challenges.

Please refer to the descriptions of the individual categories for information on eligibility to enter a particular category. The nomination must clearly demonstrate impacts relating to the specific category.

Who is eligible to apply

Only UIC members (active, associate or affiliate) are eligible to nominate a project or initiative for an award, and the project must have the direct involvement of the UIC member. However, the project may additionally have the involvement or partnership of other non-UIC members.

Organisations can submit projects or initiatives that have demonstrated impact between 1 November 2021 and 15 May 2024. Projects that are in development or planning stages are not eligible. UIC members can submit an unlimited number of nominations under the same or multiple categories, but each nomination must be for distinctly different projects or initiatives.

How to apply

Participation in the UIC award is free, and applications must be submitted by **15 May 2024** (nominations submitted after 15 May 2024 will not be considered) through the following steps:

1. Read the application guidelines carefully
2. Create an account on the award dedicated website [UIC Sustainability Awards](#)
3. Fill in the online application form and choose your category [UIC Sustainability Awards | Submit your Application](#)
4. Wait for our feedback. If you are shortlisted, you will be invited to present your project to the Jury in and online meeting
5. If you are a final shortlisted, you will be invited to the awards ceremony planned during Innotrans in Berlin.

Submissions should be supported wherever possible and appropriate with evidence of impact from the project or initiative. It is therefore permitted to provide links to awards, articles, certificates, proof of project completion/initiative launch, images, videos, and evidence of environmental improvements across specific areas within the organisation.

Supporting information for submissions should be provided in English and cannot be considered confidential.

Please note. If the project or initiative has been submitted to the UIC for a previous awards scheme, it cannot be submitted a second time unless it has undergone sufficient development to be effectively considered a new entity.

Evaluation parameters

The judges will score applications on the basis of the following judging parameters:

- **35%** Impact on SDGs (high score if co-benefits are hitting several UN SDGs)
- **35%** Demonstrable and quantifiable impacts for the topic
- **15%** Demonstrating staff and/or community engagement (collaboration and communication)
- **15%** Longevity, scalability, replicability and fostering long-term change

For each of the parameters, the jury will assign a score ranging from 1 to 10 points. The ranking of entrants will be determined by the sum of the points obtained.

In the event of a tie between two or more entrants in the same category, the entrant with the highest score in the Impact parameter will prevail.

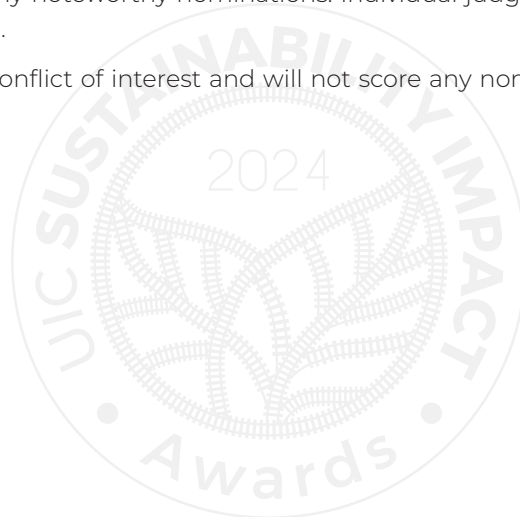

Judging process overview

1. Application forms will be reviewed for completeness, eligibility and adherence to the application guidelines.
2. Entries will be evaluated by the members of the jury, divided into different categories, who will score the entry according to the judging parameters. This scoring will decide the category shortlists.
3. Shortlisted organisations will be invited to present their projects/initiatives virtually to the presidents of the juries and the category judges, who will then convene to discuss, agree on a final score and decide the winners.
4. A final ranking will be compiled and a shortlist from each category will be invited to the Award Ceremony. In the event of a tie, the president of the judges will make a decision on the final winner.
5. The winners will be announced and presented their awards at the Award Ceremony organised within InnoTrans, the International Trade Fair for Transport Technology.

Please note. All nominations are free of charge, and there is no financial or other prize beyond a trophy and certificate of small cost.

Judges may decide to award discretionary recognition to individual projects, in addition to the winners of the four categories, in the event of particularly noteworthy nominations. Individual judges' grading and comments during deliberation will remain confidential.

Judges must declare any possible conflict of interest and will not score any nominations in which they have been involved.
