

STATION MANAGERS GLOBAL GROUP

STATION & URBAN DESIGN

GREEN STATIONS DESIGN GUIDE

This working group brings together station managers, architects, urban planners, and designers to exchange knowledge, share best practices, and collaborate on innovative projects. Its mission focuses on **fostering sustainable design**, **green infrastructure**, and **transit-oriented development (TOD)** to position railway stations as key urban hubs.

Guided by a **holistic approach to sustainability**, the group promotes **energy-efficient design**, **renewable energy use**, and **eco-conscious materials**. TOD strategies enhance multimodal connectivity, walkability, and environmentally friendly travel. The group also explores inclusive design, seamless navigation, vertical mobility, and space planning to improve passenger comfort and safety.

By driving innovation and sustainability, the group aims to **redefine railway stations as green, efficient, and community-centric spaces that shape smarter, more livable cities**.
