IRS 90940 Objective:

Standardize DAS data exchange between on-board and traffic management

This means:

- In a multi-RU environment
- Cross IM boarder
- On ERTMS lines
- On Legacy Class B ATP lines

Data requirements for ATO and C-DAS are very similar

Standards for ATO over ETCS and C-DAS cannot be identical

For C-DAS, IM should deliver extra train, infra, timing and communication data

IRS 90940 ensures one single set of data to support ATO and DAS for all RU's
