

# RAIL4CITIES EUROPEAN PROJECT

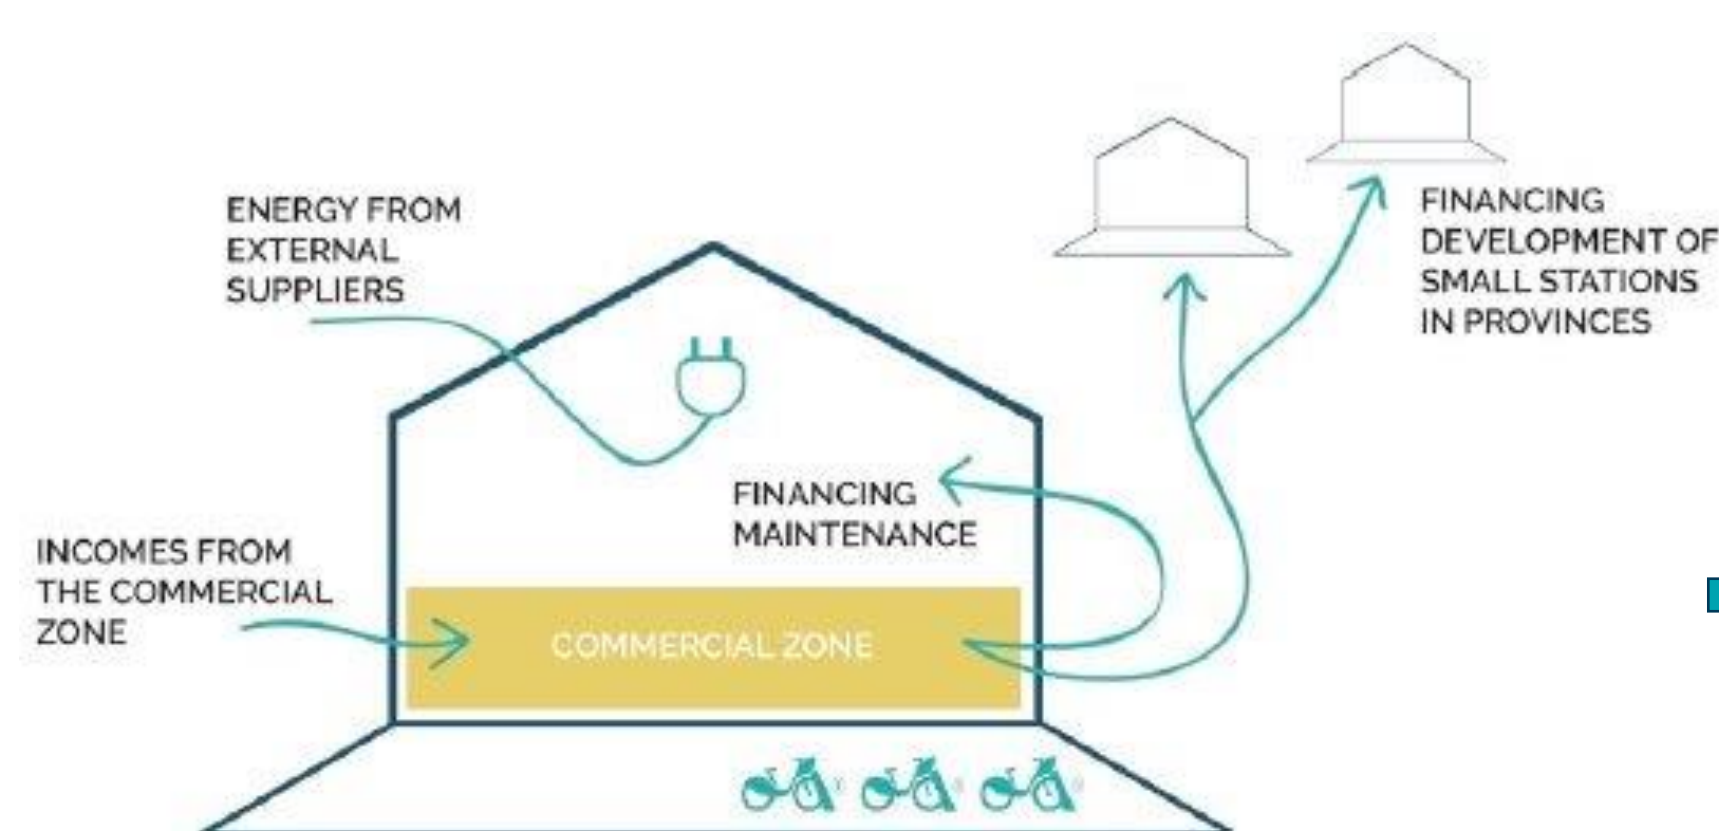

## RAILway stations FOR green and socially inclusive CITIES

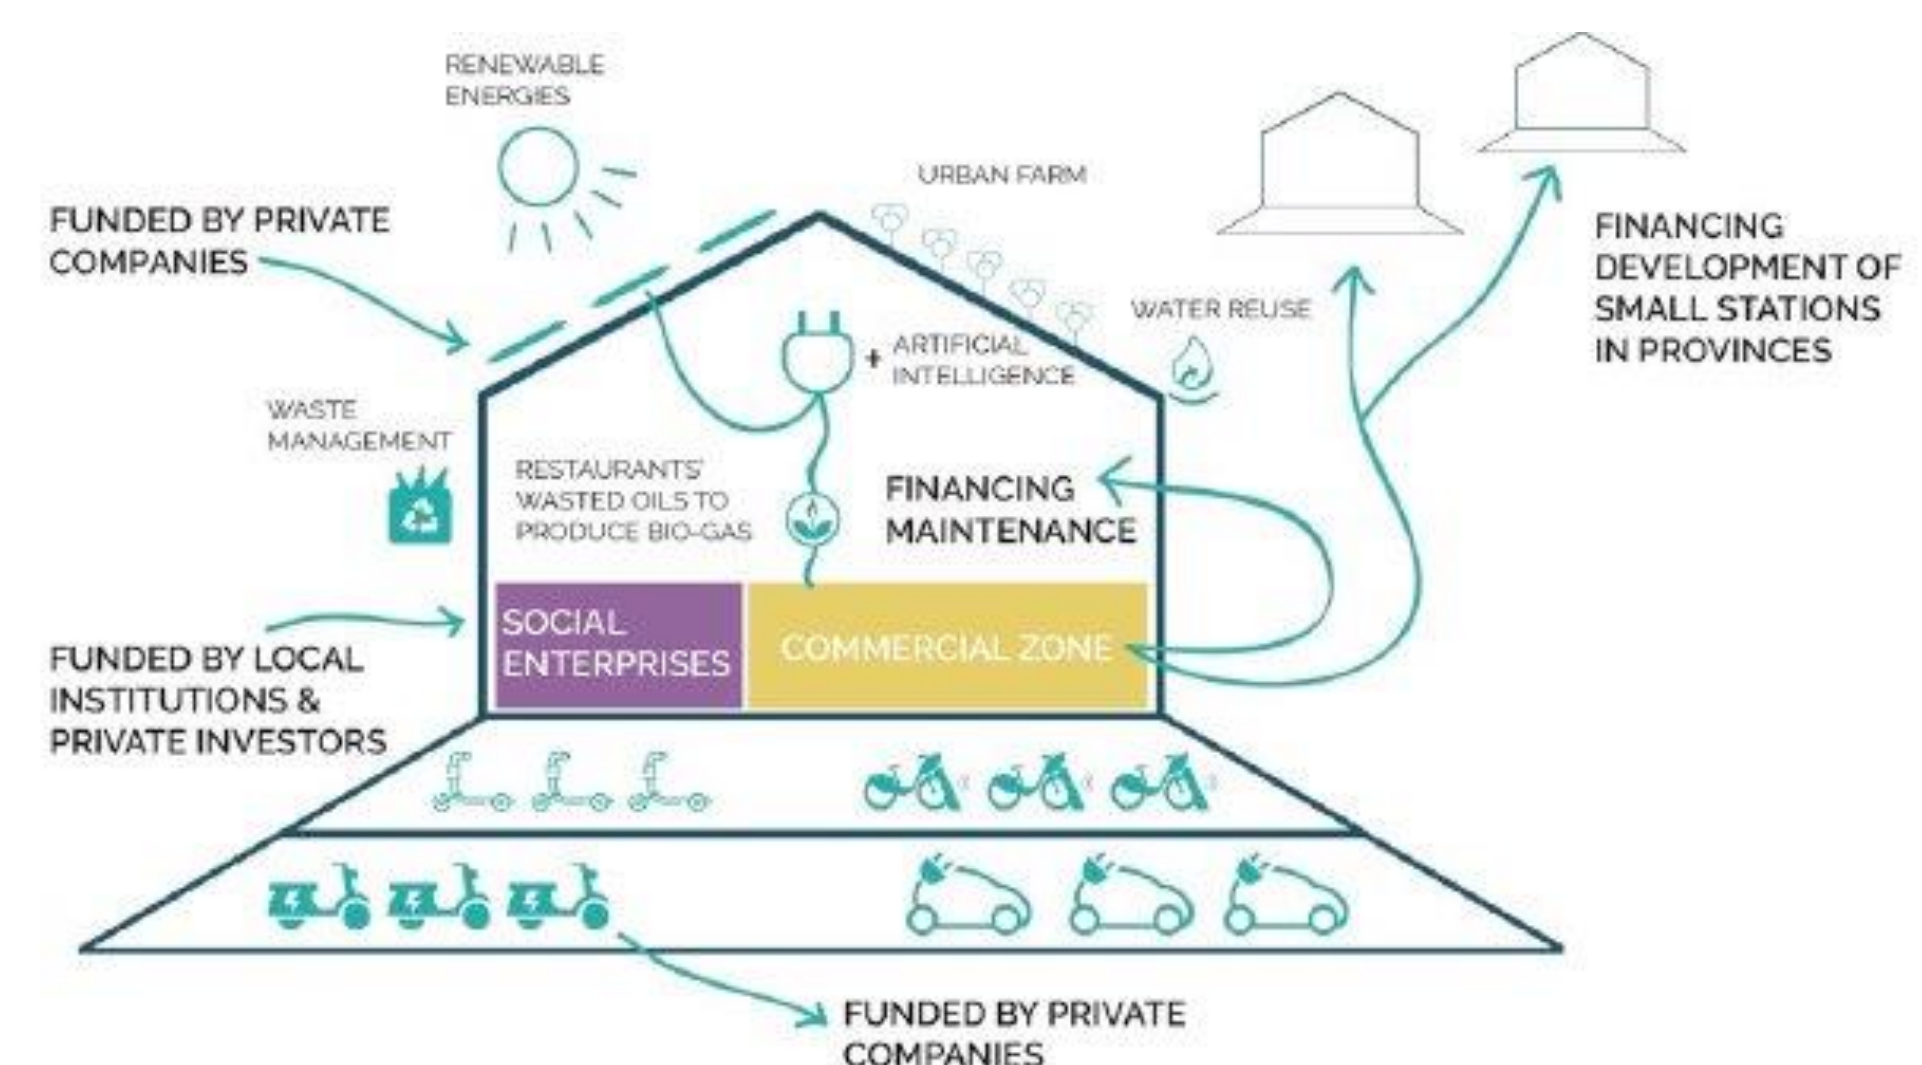

is a European project developed under the aegis of Europe's Rail and is part of the HORIZON-ER-JU work programme. It began on 1 July 2023 and will run for 24 months, until 30 June 2025. 14 partners from 7 countries are involved in the project, under the aegis of Factual Consulting SL.

The central ambition of RAIL4CITIES is to develop a new operational, readily available and highly applicable model of stations as sustainable city promoters (SCP model), combined with a common European methodology and tool for its effective implementation. The project takes inter-dependent impediments (profit-orientated business model, complex web of agents and stakeholders, policy gaps) into account and provides decision makers with the tools to transform stations into promoters of sustainable cities.

Current functioning

The Sustainable City Promoter

RAIL4CITIES introduces living labs in five European countries, each dedicated to transforming stations into green, inclusive, and energy-efficient mobility hubs.
